- Discover the potential benefits that introducing social software can bring to your business

A well defined Quickstart process

- An initial complementary consultation to assess readiness, objectives and scope
- Agreed up front, low risk, fixed fee engagement
- Providing recommended hardware requirements
- Installation of a standardised, scalable and extensible social business environment
- Provision of technical knowledge and initial training so you can gain immediate benefits

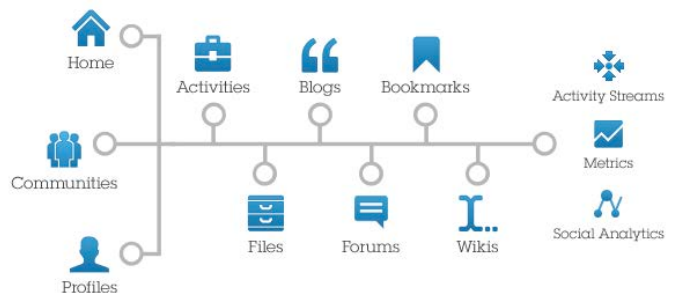

A ready-to-use social software platform

Since Release 8.5.3, IBM Notes and Domino has delivered significant new social capabilities within the user's familiar collaboration experience, enabled by entitlement to the IBM Connections **Profiles** and **Files** components at no additional charge, and delivered through plug-ins that provide convenient access from the Notes sidebar.

The Intec Connections QuickStart for IBM Notes and Domino will install an Implementation of IBM Connections Files and Profiles, provide deployment assistance, and provide a knowledge transfer session with administration staff of your choice.

About IBM Connections

IBM Connections is the market leading, integrated and secure social software platform that helps people engage with networks of expertise in the context of critical business processes in order to act with confidence and anticipate and respond to emerging opportunities.

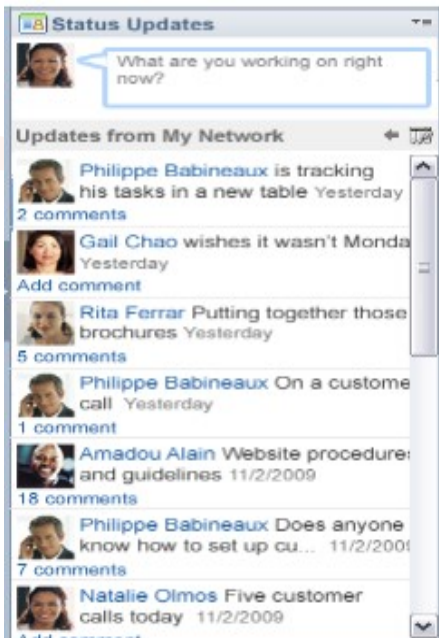

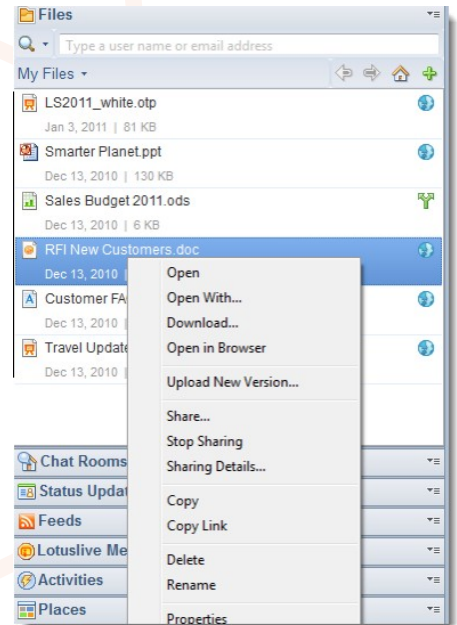

Leading organizations are achieving real business value with IBM Connections by creating new ways to activate employees and delight customers.

Using the Files Plug-in for Lotus Notes

The Connections Files plug-in lets you upload and access files from the sidebar of your Notes client. After installing the sidebar application you can:

- Upload files for your own use or to share with others
- Drag and drop an attached file or a file from your desktop to Files
- Drag and drop or copy and paste a file from Files to your desktop
- Send an HTML link to a file
- Search for people or communities
- Sort files for easier browsing
- Detach the Files window from the Notes sidebar
- Open Connections Files in a browser

Using the Status Updates Plug-in for Lotus Notes

Keep up-to-date with what is happening in your network with the Status Updates application:

- Post your status so that colleagues can see what you are working on
- View status updates from colleagues in your network or you are following
- View profiles of colleagues
- Comment on a status posting
- Clear your status
- Forward a status message
- View the list of people you follow
- View your company organisation structure
- View and update your Status when not in Notes
