Do your best teamwork with Watson Workspace sintec

Get to better outcomes, faster, with the power of AI integrated into every interaction

- There is virtually no part of **Human Resources** that will remain untouched by cognitive: recruitment, learning, performance become easier, quicker, more robust and more efficient as new technologies provide instrumental insights and invaluable
- Businesses are implementing New Ways of Working, with and drive competitive differentiation
- However despite a proliferation of Productivity apps across the enterprise, line-of-business is telling us that they struggle to **stay in the flow** of productivity: too much data, apps and conversations leading to multiple interruptions and information overload....

The impact on team productivity

- 8.14 hours per week wasted looking for people*
- 7.36 hours looking for information*
- 7.38 hours looking for data*

\$588 Billion**

- * Workforce Transformation Survey (IDC)
- ** Cost of interruptions to US economy (Basex Research)

All Happening in Real-time

What if....?

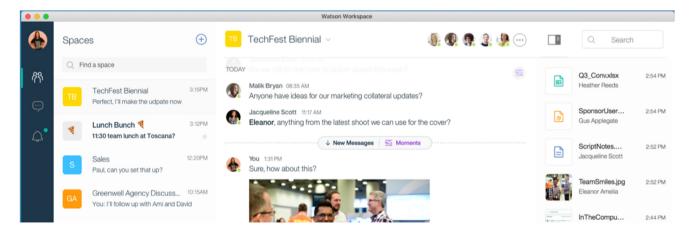

You had a single pane of glass to get vour work done?

You could stay in the flow without having to switch from application to application?

The information you need is brought to you, rather than you needing to go and find it?

IBM Solution: Team-based cognitive collaboration

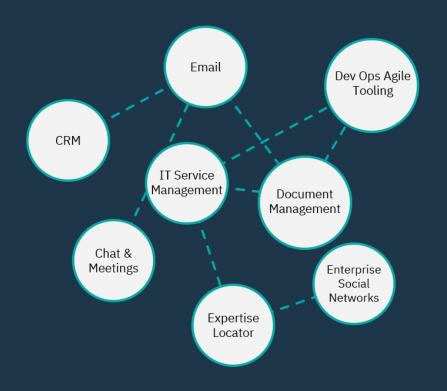

IBM Watson Workspace is a cross-device collaboration app featuring team-based persistent conversations infused with cognitive insight from IBM Watson. Workspace can be tuned to understand business conversations and help you to take action - in context - direct from the conversation.

This will also deliver game-changing outcomes for all lines of business, including:

- IT Service Management: System incident response and service uptime
- Sales: increased seller productivity and reduction in time spent on non-core activities
- **DevOps:** increased team agility and project pipeline velocity
- Cyber Security: threat violation management and resolution

Take the siloed, non-cognitive applications you use today ...

Watson Workspace provides the cognitive glue that filters out the noise and helps you focus on what matters to you.
